

μWeb - Bug #5777

uWeb converts datetime objects to a string incorrectly

2019-11-25 14:59 - Erwin Hager

Status:	New	Start date:	2019-11-25
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Model	Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
datetime.datetime(2019, 11, 22, 14, 32, 50, 689063, tzinfo=datetime.timezone.utc) will be converted to '2019-11-22T14:32:50.689063+00:00' which MySQL doesn't accept. The timezone information of the MySQL server should be used when converting to a string and back. The string should not contain any timezone information.
