

## μWeb - Bug #779

### Internal Server Error (HTTP 500) page actually serves a HTTP/1.0 200 OK header.

<b>Description</b>			
The standard internal server error debug page ("We're not sure what you did, but it definitely tripped up the server.") says "Internal Server Error (HTTP 500)" in the page, however it is still served as a 200 OK in the headers.
